

# Introduction to Robotics

---

Santosh Thoduka

September 12, 2018

Hochschule Bonn Rhein Sieg

# Introduction

- Motivation: to introduce you to high-level keywords and concepts in robotics
- Outline: watch videos and create a mindmap on the board
- This is *not* a lecture; it is a discussion
- Further reading: Springer Handbook of Robotics  
(<https://www.springer.com/de/book/9783540303015>)

# Videos!

- b-it-bots@Work Precision Placement Test

# Videos!

- b-it-bots@Work Precision Placement Test
- Tech United Mid-sized League soccer

# Videos!

- b-it-bots@Work Precision Placement Test
- Tech United Mid-sized League soccer
- b-it-bots@Home weighing a bottle

# Videos!

- b-it-bots@Work Precision Placement Test
- Tech United Mid-sized League soccer
- b-it-bots@Home weighing a bottle
- Australian Centre for Robotic Vision Amazon Picking Challenge

# Videos!

- Australian Centre for Robotic Vision Amazon Picking Challenge
- Nimbro at MBZIRC 2017

# Domains

- Navigation
- Sensing
- Manipulation
- Task Planning

# Navigation

- World model

- World model
- SLAM

Videos:

- [06-Mapping]

# Navigation

- World model
- SLAM
- Path planning

Videos:

- [06-Mapping]

# Navigation

- World model
- SLAM
- Path planning
- Motion planning - how do robots move?

Videos:

- [06-Mapping]

# Navigation

- World model
- SLAM
- Path planning
- Motion planning - how do robots move?
- Obstacle avoidance

Videos:

- [06-Mapping]

# Navigation

- World model
- SLAM
- Path planning
- Motion planning - how do robots move?
- Obstacle avoidance
- What about aerial, underwater and legged robots?

Videos:

- [06-Mapping]

# Sensing

- Laser scanner
- 2D camera
- 3D camera
- Sonar
- IMU
- Microphone
- Tactile
- Force and torque

# Vision

# Sensing

## Vision

- Object detection and recognition

Videos:

- [07-3D-Detection]

# Sensing

## Vision

- Object detection and recognition
- Person / face detection and recognition

Videos:

- [07-3D-Detection]

# Sensing

## Vision

- Object detection and recognition
- Person / face detection and recognition
- Visual servoing

Videos:

- [07-3D-Detection]
- [08-Visual-Servoing]

# Sensing

## Vision

- Object detection and recognition
- Person / face detection and recognition
- Visual servoing
- Motion detection

Videos:

- [07-3D-Detection]
- [08-Visual-Servoing]

# Sensing

## Vision

- Object detection and recognition
- Person / face detection and recognition
- Visual servoing
- Motion detection
- Tracking

Videos:

- [07-3D-Detection]
- [08-Visual-Servoing]

# Sensing

## Vision

- Object detection and recognition
- Person / face detection and recognition
- Visual servoing
- Motion detection
- Tracking
- Action recognition

Videos:

- [07-3D-Detection]
- [08-Visual-Servoing]

# Sound

# Sensing

## Sound

- Speech recognition

# Sensing

## Sound

- Speech recognition
- Speaker identification

# Sensing

## Sound

- Speech recognition
- Speaker identification
- Sound localization

# Sensing

## Sound

- Speech recognition
- Speaker identification
- Sound localization
- Anomalous sound classification

- Force / load sensing

- Force / load sensing
- Tactile
  - Compliant motion
  - Grasp verification

- Force / load sensing
- Tactile
  - Compliant motion
  - Grasp verification
- Inertial

- Force / load sensing
- Tactile
  - Compliant motion
  - Grasp verification
- Inertial
- Range

# Manipulation

- Model identification

- Model identification
- Motion planning

Videos:

- [09-Motion-Planning]

# Manipulation

- Model identification
- Motion planning
- Motion control

Videos:

- [09-Motion-Planning]

# Manipulation

- Model identification
- Motion planning
- Motion control
- Force control

Videos:

- [09-Motion-Planning]
- [10-Force-Control]

- Model identification
- Motion planning
- Motion control
- Force control
- Grasping

Videos:

- [09-Motion-Planning]
- [10-Force-Control]

# Planning

# Task Planning

## Hardcoded state machine for Basic Transportation Task

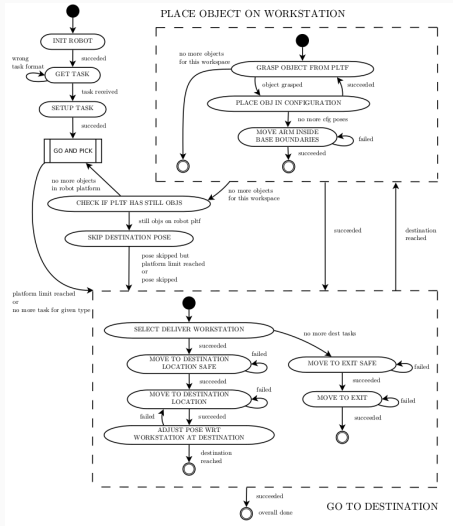

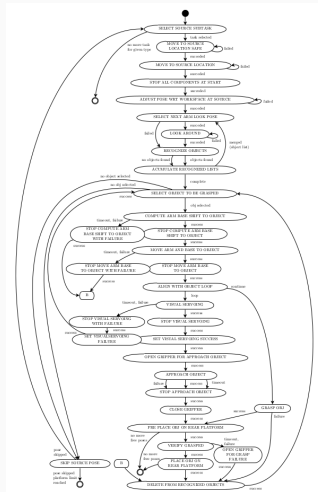

Figure 1: Basic Transportation Task [1]

## Hardcoded state machine for pick object

**Figure 2: Pick object [1]**

# Task Planning

## Sample plan for Basic Transportation Task

```
(move_base youbot-brsu start ws02)
(perceive youbot-brsu ws02)
(pick youbot-brsu ws02 bearing-00)
(stage youbot-brsu platform_left bearing-00)
(move_base youbot-brsu ws02 ws04)
(unstage youbot-brsu platform_left bearing-00)
(place youbot-brsu ws04 bearing-00)
```

# Task Planning

## Sample plan for making peppermint tea

**Listing 1** A successfully generated plan for making peppermint tea

```
[1] (!goto kettle1 ForGrasping)
[2] (!access kettle1)
[3] (!open kettle1)
[4] (!grasp kettle1 ForTransport)
[5] (!goto kitchenSink ForFilling)
[6] (!position kettle1 ForFilling)
[7] (!opentap coldtap ForFilling)
[8] (!closetap coldtap)
[9] (!grasp kettle1 ForTransport)
[10] (!goto kettleBase ForReplacing)
[11] (!access kettleBase1)
[12] (!replace kettle1 kettleBase)
[13] (!close kettle1)
[14] (!boilWaterInKettle kettle1)
[15] (!goto teacup2 ForGrasping)
[16] (!access teacup2)
[17] (!grasp teacup2 ForTransport)
[18] (!placeNextTo teacup2 kettle1)
[19] (!goto peppermintTeabag ForGrasping)
[20] (!access peppermintTeabag)
[21] (!grasp peppermintTeabag ForMakingTea)
[22] (!placeIn peppermintTeabag teacup2)
[23] (!pourhot kettle1 teacup2)
[24] (!goto kettleBase1 ForReplacing)
[25] (!access kettleBase1)
[26] (!replace kettle1 kettleBase)
```

**Figure 3:** Plan for making peppermint tea [2]

- Languages: C++, Python, Java

- Languages: C++, Python, Java
- Frameworks: ROS, Orocos, Fawkes

- Languages: C++, Python, Java
- Frameworks: ROS, Orocos, Fawkes
- Simulators: Gazebo, Stage, V-Rep, OpenRAVE

- Languages: C++, Python, Java
- Frameworks: ROS, Orocos, Fawkes
- Simulators: Gazebo, Stage, V-Rep, OpenRAVE
- Useful libraries: KDL, OpenCV, PCL, ZeroMQ, etc.

## Some other topics

- Natural language processing

## Some other topics

- Natural language processing
- Fault detection and error recovery

## Some other topics
